

## OKLAHOMA SCHOOL of SCIENCE and MATHEMATICS

Dear Parents:

I write this update with a little bit of trepidation as this an evolving situation and circumstances may change.

As you know, our plan is to finish out the fall semester remotely. Information about final exam schedules and academic-related items will come from VP Academic Services Dr. Brent Richards.

Our present plan is to start the spring semester in person on Monday, January 11, 2021.

Students will move into the Residence Hall the week and days before the start of classes. The specific information about the move-in process will come from our Residence Hall Director Ms. Hiatt.

Our present plan is not to have a weeklong spring break where students return home and back to campus to finish the semester. Presently, our plan is to conclude the spring session on May 21, 2021. If conditions permit, we will have graduation on Saturday, May 22, 2021. (This past academic year, because of the Covid situation, we had graduation on the grounds of the school campus in the afternoon of July 24. Traditionally, our graduations have been on the Saturday following the last day of spring term final exams and at the State Capitol.)

For those students who may be struggling, we plan to have some sort of ramp-up program in the weeks between the fall and spring semesters. (My academic background is in math and invite students to reach out to me if they would like 1-1 or group help/review sessions. Feel free to reach out to me via email or text.)

Please continue to monitor our web and social media sites as well as read updates in the parent newsletter. Our academic schedule may change as the situation warrants. I am in consultation with health and medical experts and assure you that decisions are being considered and made with the safety and well-being of your students as a priority.

Sincerely,

Frank Wang
