

# Free in-person math student workshop set at WOSC

## STAFF REPORT

Virtual environments are difficult environments in which to teach complex math concepts.

As such, the Oklahoma School of Science and Mathematics (OSSM) announced today it will host a free one-day math workshop for middle school students in Altus and Lawton.

Designed for students entering grades seven through nine in fall of 2021, the in-person workshop, led by President Frank Wang, will help them catch up on math concepts that have proven difficult to teach virtually.

The Altus event will be Tuesday, June 15 from 8:30

a.m. to 3:30 p.m.

Lunch will be provided. To register for the event, visit the website at [ossm.edu](http://ossm.edu).

## About OSSM

Nationally ranked as a top public high school in the United States, OSSM provides a college-level, academically advanced curriculum in science and mathematics to juniors and seniors across the state.

Created through legislative action in 1983, the two-year residential public high school serves all Oklahoma schools and students through statewide math contests, day workshops for students,

residential summer academies for students, teacher professional development workshops, and outreach activities for students of varying ages.

In addition to its residential program, OSSM has six regional locations as well as a virtual program, through which students participate in a one-to three-year scholastic program while maintaining their local high school affiliation. These locations include Enid, Okmulgee, Poteau, Stilwell, Tahlequah and Wayne.

For more information, call (405) 521-6436 or visit the website at [www.ossm.edu](http://www.ossm.edu).

The Lawton Constitution

# Math workshop set in Altus

The Oklahoma School of Science and Mathematics will host a math workshop in Altus to help bolster virtually learning certain math notions.

The event will be taught by President Frank

Wang. The workshop will consist of science and math principles that have been proven hard to teach virtually, giving students a full day to refine their skills with more learning lessons going virtual, ac-

ording to a press release.

The event will be held from 8:30 a.m. to 3:30 p.m. June 15 at Western Oklahoma State College in Altus. To register, visit the website at [ossm.edu](http://ossm.edu).
