Mustang student at OSSM earns perfect score on national math test

The Oklahoma School of Science and Mathematics (OSSM) announced recently that Wesley Horn from Mustang, currently a junior at OSSM, earned a perfect score (10 of 10) on the calculus contest of the Continental Math League (CML), a national program. The first of four rounds was held on Thursday, Dec. 1. The remaining contests will be held in spring 2023.

"OSSM students typically perform very well on this national test as the content closely reflects our Calculus curriculum," said Edna McDuffie Manning, Ed.D., interim president of OSSM.

"The CML maximizes student opportunities to improve problem-solving capabilities, and we are proud of all our students' performance."

Overall, 12 OSSM students participated in the contest, with eight of them earning perfect scores. The team score, which is derived from the top six scores, was 60/60.

About CML

The CML began in 1980 with the hope that its materials and contests would be a valuable supplement to school programs. The goal is to help students improve their reading comprehen-

sion and problem-solving skills. For more information, visit <https://www.cm-league.com>.

About OSSM

Nationally ranked in the top 1 percent of public high schools in the United States, OSSM provides a college-level, academically advanced curriculum in science and mathematics to juniors and seniors. Created through legislative action in 1983, the two-year residential, college-level education is available to all high school students in Oklahoma since tuition, room and board are provided by the state.
